Worldwide Archiving + Indexing

Recent Improvements

Copernicus Office Editor Application

July 2011

Plagiarism Check

- Newly submitted manuscripts (MS) are checked against iThenticate
- Significant similarities are shown to the MS editor through a report
- Comparison to three different sources:
 - **CrossCheck:** the CrossCheck database contains about 30 million documents from scientific journals, conference proceedings and books. All main publishers in STM (Science, Techniques, Medicine) submit their published articles to CrossCheck
 - **Internet:** iThenticate indexes billions of web pages and stores the content of the eight previous years. Everyday they index several million web documents
 - **Publications:** Third party periodicals different from CrossCheck are indexed containing EBSCO and other databases

Journal Statistics

- Chief Editors access their journal's statistics from the CO Editor portal <http://editor.copernicus.org>
- The following statistics can be shown and downloaded:
 - Editor Statistics: activities of the different topical editors
 - Paper Statistics: submission and publication numbers, durations of different system processes

MS Types

- A journal may define different types of manuscripts (Research, Review, Technical Note, etc.).
- The following parameters can be modified for each MS type:
 - Editors to be called
 - Deadlines & Reminders
 - Editor & Referee Report Forms
 - Parameters (var.)

Special Issues

To be defined per SI (optionally):

- Editors to be called
- Topics of the SI
- Editor to Topic Assignment
- Access of Guest-Editors to MS Records
- Inter-Journal SIs

**Thank you very much
